Education

Vellore Institute of Technology Chennai, India
B.Tech – Computer Science Engineering
July 2023 – Present
CGPA: 9.12
Navdeep Public School Kollam, Kerala
High School – CBSE
May 2021 – May 2023
Graduated with 94.2% in Grade 12

Skills

Languages
Python • Java • JavaScript • LaTeX
Frameworks & Libraries
React • Astro • Node.js • Express.js •
PyTorch • TensorFlow • Keras •
Scikit-learn • Pandas • NumPy

Databases
MongoDB • SQL • SQLite3

Tools
VS Code • JupyterLab • Google Sheets •
Obsidian • Adobe Photoshop •
DaVinci Resolve • Unity • Godot

Operating Systems
Linux (Arch, WSL, CLI) • Windows

Certifications

- 1st Place – FOSSIT (LUGVITC, April 2024)
- Volunteer Recognition Award – Raptee.HV, CodeVolt (Mar 2025)
- Full Stack MERN Certification (Delta Course) – ApnaCollege
- Agile & Design Thinking – IBM
- DevOps Fundamentals – IBM

Projects

Reinforcement Learning – BipedalWalker (TD3 & TD3-FORK) GitHub
PyTorch • Gymnasium • CUDA

- Implemented TD3 from scratch in PyTorch (replay buffer, twin critics, actor, Polyak target updates) with no RL library dependencies; trained on BipedalWalker-v3 to avg reward **+280/300** in **1M steps** on personal GPU.
- Built a live **6-panel** Matplotlib training dashboard (reward curves, Q-value drift, action distributions, TD error) and a threaded pygame render window with HUD overlay displaying training in real time without blocking the training loop.
- Extended the agent with TD3-FORK (forward dynamics model predicting next state from current state-action) to address long-horizon credit assignment failure on BipedalWalkerHardcore-v3; reward improved from **-40 to +100+** within **900k steps**.

Placement Tracker Platform (Full-Stack Features & Data Pipelines) GitHub
TypeScript • Svelte • SQLite3

- Engineered granular placement tracking and shortlisting pipelines using **Svelte** and **SQLite**.
- Architected data import pipelines processing **15,000+** student and company records via **TypeScript** scripts, ensuring robust **data integrity and mapping accuracy**.
- Executed a structural database migration from legacy student IDs to a unified **NeoID** architecture, implementing efficient SQL joins and pagination to slash query latency from **2000ms to 50ms**.

Image Denoising Autoencoder GitHub
TensorFlow • Keras • Python

- Built a hybrid Inception-ResNet denoising autoencoder in TensorFlow/Keras trained on DIV2K, using Inception blocks (**1×1, 3×3, 5×5**) and stacked ResNet residual blocks across a **3-stage** encoder.
- Implemented a U-Net style decoder with skip connections and mixed-precision training (float16) to preserve spatial detail while halving activation VRAM consumption.
- Engineered a memory-efficient pipeline using a custom Keras Sequence generator for on-the-fly noise augmentation across **5000 patches** from **800 source images**.

Extracurricular Activities

The Linux Club VIT Chennai
Media Lead June 2024 – April 2026

- Directed content photography and videography, curating and managing a 100GB+ media repository to drive social media campaigns and boost community engagement at VIT Chennai.
- Designed event websites and promotional posters for club events and open-source initiatives.

The Robotics Club VIT Chennai
Media & Design Lead April 2025 – April 2026

- Designed promotional posters, banners, and visual assets for robotics events and competitions.
- Managed event photography and media content, streamlining cloud storage uploads and social media distribution to maximize club visibility and outreach.

CodeVolt ’25 Hackathon VIT Chennai
Volunteer March 2025

- Supported event coordination, ensuring a seamless experience for participants and judges.
- Assisted teams with technical queries and troubleshooting during the hackathon.
- Collaborated with organizers and volunteers for smooth event execution.
