Education

Vellore Institute of Technology Chennai, India
B.Tech – Computer Science Engineering
July 2023 – Present
CGPA: 9.12

Navdeep Public School Kollam, Kerala
High School – CBSE
May 2021 – May 2023
Graduated with 94.2% in Grade 12

Skills

Languages
Python • Java • JavaScript • LaTeX

Frameworks & AI
Gemini API • PyTorch • TensorFlow •
React • Node.js • Express.js •
Scikit-learn • Pandas • NumPy

Databases
MongoDB • SQL • SQLite3

Tools
Gemini CLI / Agents • Git • VS Code •
JupyterLab • Adobe Photoshop •
Unity • Godot

Operating Systems
Linux (Arch, WSL, CLI) • Windows

Certifications

- 1st Place – FOSSIT (LUGVITC, April 2024)
- Volunteer Recognition Award – Raptee.HV, CodeVolt (Mar 2025)
- Full Stack MERN Certification (Delta Course) – ApnaCollege
- Agile & Design Thinking – IBM
- DevOps Fundamentals – IBM

Projects

PICSHARE: AI-Powered Cloud Photo Gallery & Storage Pipeline GitHub
Open-Source Contribution

- Architected a 3-tier hybrid storage pipeline with Google Drive cold storage and automated raw file purging, slashing server disk usage by 98.8% (300+ GB to 3.5 GB per 10k photos).
- Engineered an on-demand WebP caching tier, reducing image payload by 95% (30 MB to 300 KB) and eliminating cloud API rate limits to achieve sub-10ms modal load latency.
- Built a client-side HTML5 Canvas compression engine in TypeScript, downscaling 10–30 MB uploads to <200 KB in <50ms to eliminate HTTP 413 errors while preserving InsightFace facial recognition accuracy.

Placement Tracker Platform (Full-Stack Features & Data Pipelines) GitHub
TypeScript • Svelte • SQLite3

- Engineered granular placement tracking and shortlisting pipelines using Svelte and SQLite.
- Architected data import pipelines processing 15,000+ student and company records via TypeScript scripts, ensuring robust data integrity and mapping accuracy.
- Executed a structural database migration from legacy student IDs to a unified NeoID architecture, implementing efficient SQL joins and pagination to slash query latency from 2000ms to 50ms.

Image Denoising Autoencoder GitHub
TensorFlow • Keras • Python

- Built a hybrid Inception-ResNet denoising autoencoder in TensorFlow/Keras trained on DIV2K, using Inception blocks (1×1, 3×3, 5×5) and stacked ResNet residual blocks across a 3-stage encoder.
- Implemented a U-Net style decoder with skip connections and mixed-precision training (float16) to preserve spatial detail while halving activation VRAM consumption.
- Engineered a memory-efficient pipeline using a custom Keras Sequence generator for on-the-fly noise augmentation across 5000 patches from 800 source images.

Extracurricular Activities

The Linux Club VIT Chennai
Media Lead June 2024 – April 2026

- Directed content photography and videography, curating and managing a 100GB+ media repository to drive social media campaigns and boost community engagement at VIT Chennai.
- Designed event websites and promotional posters for club events and open-source initiatives.

The Robotics Club VIT Chennai
Media & Design Lead April 2025 – April 2026

- Designed promotional posters, banners, and visual assets for robotics events and competitions.
- Managed event photography and media content, streamlining cloud storage uploads and social media distribution to maximize club visibility and outreach.

CodeVolt '25 Hackathon VIT Chennai
Volunteer March 2025

- Supported event coordination, ensuring a seamless experience for participants and judges.
- Assisted teams with technical queries and troubleshooting during the hackathon.
- Collaborated with organizers and volunteers for smooth event execution.
