Education

University / College Name	City, Country
B.S. in Computer Science	
Aug 2022 – Present	
GPA: 3.9 / 4.0	
High School Name	City, Country
High School Diploma	
Aug 2020 – May 2022	
Honors / Distinction	

Skills

Languages

Python • TypeScript • JavaScript • C++ • Java • SQL

• LaTeX

Frameworks & Libraries

React • Next.js • Node.js •

FastAPI • PyTorch • TensorFlow •

Express.js • Pandas • NumPy

Databases

PostgreSQL • MongoDB • Redis • SQLite

Tools & Platforms

Git • Docker • GitHub Actions •

Linux (Bash/CLI) • AWS / GCP • VS Code

Operating Systems

Linux (Arch, Ubuntu, CLI) • Windows

Certifications

- 1st Place Winner**
(National / Hackathon Event, 2024)
- Cloud Solutions Certification**
– Cloud Provider (AWS / GCP)
- Full Stack Web Specialization**
– Online Academy
- Agile & Scrum Fundamentals**
– Industry Certification

Projects

Cloud Microservices Platform

Go • Docker • Kubernetes • PostgreSQL

Architected a high-throughput microservices backend in **Go** and **Docker**, supporting **10,000+** requests/sec with low tail latencies.

Engineered an event-driven messaging queue with **RabbitMQ**, reducing peak database write overhead by **70%**.

Implemented automated health probes, zero-downtime rolling deployments, and container orchestration via **Kubernetes**.

GitHub

Deep Learning Computer Vision System

PyTorch • OpenCV • CUDA • Python

Developed and trained a convolutional neural network in **PyTorch** on DIV2K and ImageNet, achieving **95.2%** validation accuracy.

Implemented mixed-precision inference (float16) with TensorRT, accelerating frame rates from **22 FPS to 65 FPS** on embedded hardware.

Built a modular data ingestion and augmentation pipeline processing **50k+** training samples with custom transformation layers.

GitHub

Full-Stack Analytics Dashboard

TypeScript • React • Node.js • TailwindCSS

Engineered an interactive real-time telemetry dashboard using **React** and **TypeScript**, visualizing dynamic data streams via WebSockets.

Designed RESTful API endpoints and optimized database queries in **PostgreSQL**, slashing query response times from **800ms to 45ms**.

Implemented role-based access control (RBAC), JWT session management, and automated end-to-end integration tests.

GitHub

Extracurricular & Leadership

Student Technical Society

University Name

Lead Coordinator

Aug 2023 – Present

Directed technical operations and hands-on workshops for **250+** student members, mentoring peers in modern software development.

Managed the club’s open-source projects, community code reviews, and digital communication channels.

Regional Hackathon

City / Campus

Organizer & Technical Volunteer

March 2024

Supervised technical infrastructure, developer tooling, and API key provisioning for **40+** participating teams.

Collaborated with industry judges and faculty organizers to facilitate team evaluation and smooth event execution.
