EDUCATION

University / College Name

Bachelor of Science in Computer Science

- GPA: **3.9** / **4.0** (or equivalent honors/awards)

City, State / Country

Aug 2022 – Present

High School / Secondary Education

High School Diploma

- Graduated with **Honors** / **Distinction** (Top 5% of class).

City, State / Country

Aug 2020 – May 2022

PROJECTS

Project Name 1 (Scalable Cloud Architecture) | Tech Stack 1, Tech Stack 2, Cloud

🐙 GitHub

- Architected a high-throughput backend data pipeline using **FastAPI** and **PostgreSQL**, reducing query latency by **40%** across **100k+** records.
- Engineered an on-demand caching tier with **Redis**, decreasing payload sizes by **85%** and eliminating API rate-limit bottlenecks.
- Containerized the service with **Docker** and configured automated CI/CD pipelines via **GitHub Actions** for zero-downtime deployments.

Project Name 2 (Machine Learning / Deep Learning) | PyTorch, Python, NumPy, Pandas

🐙 GitHub

- Implemented an end-to-end computer vision / RL model from scratch in **PyTorch**, achieving **94.5%** accuracy on benchmark validation datasets.
- Optimized inference throughput using mixed-precision training (**float16**) and CUDA kernel optimizations, halving GPU VRAM memory usage.
- Built an interactive visualization dashboard displaying metrics, loss convergence, and real-time inference results.

Project Name 3 (Full-Stack Web Application) | TypeScript, React, Node.js, TailwindCSS

🐙 GitHub

- Developed a responsive full-stack platform serving **5,000+** monthly active users with authentication and real-time updates.
- Designed modular RESTful APIs and database schemas with relational data integrity and automated unit testing (**90%+** coverage).
- Implemented client-side caching and performance optimizations, reducing Initial Page Load time from **2.4s** to **0.6s**.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, C++, Java, SQL, HTML/CSS, LaTeX

Frameworks & Libraries: React, Next.js, Node.js, FastAPI, PyTorch, TensorFlow, Express.js, Pandas, NumPy

Databases: PostgreSQL, MySQL, MongoDB, Redis, SQLite

Tools & Cloud: Git, Docker, GitHub Actions, Linux (Bash/CLI), AWS / GCP, VS Code, Postman

Core Concepts: Data Structures & Algorithms, System Design, REST APIs, CI/CD, Agile / Scrum

LEADERSHIP & EXTRACURRICULAR

Student Technical Club / Society

University Name

Technical Lead / Core Organizer

Month 2023 – Present

- Organized technical workshops and hackathons for **300+** student participants, managing mentorship sessions and judging criteria.
- Led a team of **8** contributors developing and maintaining open-source web applications and community tools.

Annual Hackathon / Tech Fest

City / University

Lead Coordinator / Volunteer

Month 2024

- Coordinated event operations and technical support across **50+** hackathon teams under strict deadlines.
- Collaborated with corporate sponsors and faculty advisors to ensure smooth logistics and technical resources.

CERTIFICATIONS & HONORS

1st Place Winner – National / University Hackathon Competition (2024)

Certified Solutions Architect / Developer – Cloud Provider (AWS / GCP / Azure)

Full-Stack Web Development Specialization – Recognized Academy / Online Platform

Dean's Honor List / Academic Merit Scholarship – University Name
