Education

Vellore Institute of Technology Chennai, India

B.Tech – Computer Science Engineering

July 2023 – Present

CGPA: **9.12**

Navdeep Public School Kollam, Kerala

High School – CBSE

May 2021 – May 2023

Graduated with **94.2%** in Grade 12

Skills

Languages

Python • Java • JavaScript • LaTeX

Frameworks & AI

Gemini API • PyTorch • TensorFlow • React • Node.js • Express.js • Scikit-learn • Pandas • NumPy

Databases

MongoDB • SQL • SQLite3

Tools

Claude Code • OpenCode • Gemini CLI / Agents • Git • VS Code • JupyterLab • Adobe Photoshop • Unity • Godot

Operating Systems

Linux (Arch, WSL, CLI) • Windows

Certifications

- **1st Place – FOSSIT** (LUGVITC, April 2024)
- **Volunteer Recognition Award** – Raptee.HV, CodeVolt (Mar 2025)
- **Full Stack MERN** Certification (Delta Course) – ApnaCollege
- **Agile & Design Thinking** – IBM
- **DevOps Fundamentals** – IBM

Projects

Reinforcement Learning – BipedalWalker (TD3 & TD3-FORK)

GitHub

PyTorch • Gymnasium • CUDA

- Implemented TD3 from scratch in PyTorch (replay buffer, twin critics, actor, Polyak target updates) with no RL library dependencies; trained on BipedalWalker-v3 to avg reward **+280/300** in **1M steps** on personal GPU.
- Built a live **6-panel** Matplotlib training dashboard (reward curves, Q-value drift, action distributions, TD error) and a threaded `pygame` render window with HUD overlay displaying training in real time without blocking the training loop.
- Extended the agent with TD3-FORK (forward dynamics model predicting next state from current state-action) to address long-horizon credit assignment failure on BipedalWalkerHardcore-v3; reward improved from **-40 to +100+** within **900k steps**.

Placement Tracker Platform (Full-Stack Features & Data Pipelines)

GitHub

TypeScript • Svelte • SQLite3

- Engineered granular placement tracking and shortlisting pipelines using **Svelte** and **SQLite**.
- Architected data import pipelines processing **15,000+** student and company records via **TypeScript** scripts, ensuring robust **data integrity and mapping accuracy**.
- Executed a structural database migration from legacy student IDs to a unified **NeoID** architecture, implementing efficient SQL joins and pagination to slash query latency from **2000ms to 50ms**.

Image Denoising Autoencoder

GitHub

TensorFlow • Keras • Python

- Built a hybrid Inception-ResNet denoising autoencoder in TensorFlow/Keras trained on DIV2K, using Inception blocks **(1×1, 3×3, 5×5)** and stacked ResNet residual blocks across a **3-stage** encoder.
- Implemented a U-Net style decoder with skip connections and mixed-precision training (`float16`) to preserve spatial detail while halving activation VRAM consumption.
- Engineered a memory-efficient pipeline using a custom Keras `Sequence` generator for on-the-fly noise augmentation across **5000 patches** from **800 source images**.

Extracurricular Activities

The Linux Club

VIT Chennai

Media Lead June 2024 – April 2026

- Administered a 100GB+ digital asset repository using structured cloud storage and CLI backup workflows, supporting promotional releases and hackathon media.
- Solved technical CTF challenges across Linux environments and web security; built responsive event web pages and promotional media for open-source initiatives.

The Robotics Club

VIT Chennai

Media & Design Lead April 2025 – April 2026

- Designed high-impact visual branding, arena display banners, and technical showcase assets for robotics competitions and bot exhibitions.
- Directed live event media coverage and content distribution pipelines, boosting club outreach and spectator engagement.

CodeVolt '25 Hackathon

VIT Chennai

Volunteer March 2025

- Supported event coordination, ensuring a seamless experience for participants and judges.
- Assisted teams with technical queries and troubleshooting during the hackathon.
- Collaborated with organizers and volunteers for smooth event execution.
